*Saint-Gobain Abrasives, Bonded Abrasives Organic R&D, Northborough R&D Center, Massachusetts, USA*

Saint-Gobain is the leading manufacturer of abrasives positioned at the cutting edge of innovation and service, delivering the most comprehensive solutions for every step of the abrasive process: grinding, cutting and polishing. Saint-Gobain Abrasives, the world's leading abrasives manufacturer, is the only international supplier of abrasives that manufactures each of the 3 major types of abrasives; Bonded Abrasives (resinoid and vitrified), Coated Abrasives, and Diamond products.

Saint-Gobain Abrasives takes an innovative approach to all our business operations, and is committed to the continuous improvement of products, processes and services, creating, evaluating and exploiting new ideas to help continuously add value to our customer relations.

Innovation is at the heart of abrasives. The worldwide R&D organization is committed to continuously delivering technological excellence and to forging strong developmental collaborations with our customers.
