

Proceedings of the  
International Workshop on the Innovative Structural Materials  
for Infrastructure in 21st Century

# ULTRA—STEEL 2000

Held in Tsukuba, Japan  
12-13 January, 2000

Science and Technology Agency  
National Research Institute for Metals

# CONTENTS

---

Preface

Organizing Committee

Contents

## Plenary Lecture

— Projects on Innovative Steels in the World —

· Present Activities and Future Plans ·

- 1) Research Project on Innovative Steels in Japan (STX-21 Project) ..... 1  
Akira Satoh (NRIM, Japan)
- 2) New Generation of Iron and Steel Material in China ..... 11  
Weng Yuqing (China Iron & Steel Industry & Trade Group Corporation, China)
- 3) Development of High Performance Structural Steels for 21<sup>st</sup> Century in Korea ..... 33  
Lee Won-Pyo (Pohang Iron & Steel Co., Ltd., Korea)

## International Session 1

— Present Status of Ferritic Steel Development for USC Plants —

- 1) Present Status of Ferritic Steel Development for USC Plants in Europe ..... 65  
K.H.Mayer (GEC ALSTOM, Germany),  
H.Cerjak (Technical University Gratz, Austria),  
T.Kern (Siemens KWU, Germany),  
M.Staubli (ABB ALSTOM, Switzerland),  
D.V.Thornton (ABB ALSTOM, U.K.)
- 2) Design of Ferritic Creep-Resistant Steels ..... 89  
H.K.D.H.Bhadেশia (University of Cambridge, U.K.)
- 3) Development of 12%Cr Rotor Steels for USC Steam Power Plants ..... 109  
Y.Fukui, K.Hidaka and R.Kaneko (Hitachi Co.Ltd., Japan),  
Y.Tanaka (The Japan Steel Work Ltd., Japan),  
T.Fujita (University of Tokyo, Japan)
- 4) R & D of Advanced Ferritic Steels for 650°C USC Boilers ..... 119  
F.Abe (NRIM, Japan)

## International Session 2

— Present Status and Future Development

of Weld Structure and Joining Technology —

1) Joining Issues for New Constructional Steels .....	131
R.E.Dolby (The Welding Institute, U.K.)	
2) Fatigue and Fracture Issues of Weld In Civil Structures .....	147
C.Miki (Tokyo Institute for Technology, Japan)	
3) Progress in Welding and Joining in STX21 Project .....	159
C.Shiga (NRIM, Japan)	

### **International Session 3**

— Microstructure and Mechanical Properties of Martensitic Steels —

- Targets for Next Century in Martensite -

1) Martensitic Microstructures in Carbon Steels :	
Design of Strength-Toughness Combinations by Tempering .....	175
G.Krauss (Colorado School of Mines, U.S.A.)	
2) Investigation on a Relationship between Microstructures	
and Mechanical Properties of Martensite Using Nano-indentation Techniques .....	185
T.Ohmura, M.Hayakawa, K.Miyahara, S.Matsuoka,	
K.Tsuzaki and T.Takahashi (NRIM, Japan)	
3) Improvement in Delayed Fracture Resistance	
of Medium Carbon Tempered Martensite by Control of Grain Boundary Structure .....	195
S.Yusa, T.Hara, K.Tsuzaki and T.Takahashi(NRIM, Japan)	
4) Mechanical Properties of Martensite in Heat-Resistant Steels .....	205
H.K.D.H.Bhadeshia (University of Cambridge, U.K.)	
5) Strength and Structure Change of 9Cr-3W-3Co Martensitic Steel	
during High Temperature Deformation .....	215
H.Nakashima (Kyushu Univ., Japan)	

### **International Session 4**

— Corrosion and Protection of Marine Structure

in Harmonization with environment —

1) Corrosion Control of Infrastructures	
in Marine Environment for Sustainable Development .....	225
T.Murata (Nippon Steel Co., Japan)	
2) Corrosion Behavior of Conventional and Advanced Alloys in Marine Environments .....	231
B.S.Phull (Laque Center for Corrosion, U.S.A.)	
3) Low-Alloy Steels for Marine/Coastal Atmosphere	
in Harmonization with Environments .....	243
T.Kodama (NRIM, Japan)
