

An international peer-reviewed journal covering all aspects of nanoscience and nanotechnology in all fields of science, engineering, and medicine.

Journal of **CALL FOR PAPERS** **NANOSCIENCE and NANOTECHNOLOGY**

Volume 6 • 12 issues • 2006

Asian Editor: Dr. Katsuhiko Ariga, Japan

Journal of Nanoscience Nanotechnology

is an international and multidisciplinary peer-reviewed journal with a wide-ranging coverage, consolidating research activities in all areas of nanoscience and nanotechnology into a single and unique reference source. JNN is the first cross-disciplinary journal to publish original full research articles, rapid communications of important new scientific and technological findings, timely state-of-the-art reviews with author's photo and short biography, and current research news encompassing the fundamental and applied research in all disciplines of science, engineering and medicine.

- Electronic submission of articles
- Fast reviewing
- Rapid times to publication
- No page charges
- Free color where justified
- Distinguished editorial board
- Available both in print and online editions

RESEARCH TOPICS COVERED:

• Nanostructured Materials including semiconductors, metals, conductors, superconductors, polymers • Nanofabrication and Processing of Nanoscale Materials and Devices, CVD, Epitaxy • Nanoprobes, Spectroscopic Characterization, STM, AFM, TEM, etc. • Properties of Atomic, Molecular and Nanoscale Materials, Interactions at Nanoscale • Nanocomposites, Nanoparticles, Nanocrystalline Materials, Nanoclusters and Nanocrystals • Superlattices, Quantum Dots, Molecular and Nanowires, Nanoscale Thin Films, Nanoporous Materials • Hybrid materials, Colloids, Alloys, Nanoceramics, Self-Assembled Monolayers and Multilayers • Nanoelectronics, Nano-optics, Nanophysics, Nano-integration, Quantum Optics, Nanomagnetism • Fullerenes, Nanotubes, Nanorods, Molecular Wires, Molecular Nanotechnology • Supramolecules, Dendrimers, Self-Assemblies, Low-dimension Structures, Nanostructured Biomaterials • Structure Analysis at Atomic, Molecular and Nanometer range • Atomic Manipulation, Computational Nanotechnology, Molecular Nanoscience • Nanorobotics, Nanomechanics, Nanotribology, Nanofluidics • Applications in LEDs, Displays, Solar Cells, Batteries, Lithography, Catalysis, Memories, Coatings, etc. • Nanobiotechnology, Nanobiology, DNA Sequencing, Genomics, Nanomedicines, Drug Delivery, Biomedical Applications

READERSHIP:

The journal is intended for a very broad audience working in the fields of nanotechnology and nanoscience having strong connections with materials science, electrical and electronic engineering, solid-state physics, surface science, aerosol technology, chemistry, colloid science, ceramic and chemical engineering, polymer science and engineering, sol-gel science, supramolecular science, mechanical engineering, metallurgy and powder technology, optical science and engineering, device engineering, aerospace engineering, computer technology, information technology, environmental engineering, bionformatics, biology, pharmacy, biotechnology, food science, etc.

• High Impact factor (2.107) and Ranking • Highest Visibility • Highest Quality
